## Work experience

### 2021 – now: Co-founder, Product Designer and Developer at Techtify

Eric started Techtify together with his old colleague Niklas Liljendahl with the mission to help founders realize their dreams and ideas. To date, they have co-founded 4 companies and built/launched 5 apps in just two years. The apps are:

- Jippoo (Event management)
- Plussa (Mental health for parents)
- SafePal (Safety for women)
- Ohmi (EV management and electrification)
- Moovits (Encourage kids to be active)

### 2018 – 2021: Co-funder and CTO/CPO at Mendly

Eric co-founded Mendly to try to solve the lack of accessible mental healthcare in Sweden. The service offered chat based Cognitive Behavioral Therapy (CBT) and was a success. Eric was responsible for the design, the technical parts of the platforms (web, web app, admin system and mobile consumer app) and a team of 4 developers.

### 2018 – 2018: Lead Frontend Developer at Alpcot

Eric was responsible for the frontend development and stack choice of all internal and external systems and web apps.

### 2015 – 2018: Lead Frontend Developer at Tieto

Eric was the Lead Frontend Developer responsible for a team of 8 developers. Besides developing, Eric handled recruitment, mentorship, business development and much more. Techniques used: React, CSS/SASS, Javascript, Adobe CS.

### 2013 – 2015: Lead Frontend Developer at CGI

Eric was the Lead Frontend Developer responsible for a team of 5 developers. The primary clients were Skatteverket and Verisure. Techniques used: HTML, CSS, jQuery, Adobe CS, Sitevision.

### 2011 – 2013: Web Designer at Tankbar

Eric was responsible for everything from client contact to launch of mid sized websites. Techniques used: HTML, CSS, jQuery, Adobe CS, Sitefinity CMS.
